¹**For specific projects, we invite your inquiry and will provide a firm cost proposal.** Unit costs are based on at least one full field day of testing during normal working hours. Our fees are doubled for night work. The minimum DMT/CPTU daily fee is \$3000.00. **All tests are performed by a professional engineer. Our terms are net 45 days.**

²Drill rig and crew to create test holes will be provided by others. Fee includes data processing.

³Includes Excel spreadsheet template for settlement analysis based on Schmertmann's 1986 method.

⁴Includes Excel spreadsheet template for vertical pile capacity based on the LCPC method and comprehensive parameter analysis and color graphs of parameters.

⁵Significantly more footage per day can be achieved with deep soundings than shallow soundings. This fee provides an adjustment so that the footage unit rate can be constant.
